

Managed Detection & Response (MDR)

VISION^X
KEEPING YOU SECURE

Managed Detection & Response – Supercharged

Leveraging human and machine analysis, Smarttech247 provides 24x7 monitoring and detection, rapid investigation and mitigation, and expert threat identification and hunting.

As cyber threats become more sophisticated, it is increasingly difficult for organisations to defend against them in real-time. Attackers can stay hidden within your environment for several months, waiting for the right time to strike.

With the Smarttech247 MDR platform, you get the support your organisation needs to enhance visibility, rapidly detect and respond to advanced threats.

VisionX is a security platform that allows organisations full transparency and visibility into everything that's happening throughout their organisation.

- ✓ Smarttech247 offers Around-the-clock expert monitoring to defend against threats and stop adversaries.
- ✓ Our customer focused approach is to work with organisations and focus on getting the best system in place to detect and respond to threats.
- ✓ Reduce your cybersecurity risk, enhance visibility and rapidly respond to threats.

Smarttech247 supplies the people, technology and intelligence required to hunt for threats across your organisations networks and help shut them down before they cause damage and disruption.

The Smarttech247 MDR platform, VisionX, applies real-time, predictive analytics to detect attacks and protect against advanced malware across customers' extended networks.

The Smarttech247 Philosophy:

- ✓ **BYOT (Bring Your Own Tech) –**
We make your tech stack work harder for you.
- ✓ We will help you reduce complexity.
- ✓ We believe in setting you up in a matter of days, not weeks or months.

BRING YOUR OWN TECH – and we will make it work harder!
We integrate with **250+** security tools to help you eliminate noise and get the visibility you need.

BYOT – THE ART OF THE POSSIBLE

and many more...

About Smarttech247

Smarttech247 is a multi-award-winning **MDR (Managed Detection & Response)** company and a market leader in Security Operations. Trusted by global organizations, our platform provides threat intelligence with managed detection and response to provide actionable insights, **24/7 threat detection**, investigation, and response. Our service is geared towards proactive prevention and we do this by utilizing the latest in cloud, big data analytics and machine learning, along with our industry leading incident response team.
