VISION ˣ

The Next-Gen Managed Detection & Response

Enhanced Visibility. Smarter Risk Intelligence.
Strategic Security Decisions.

Core Concerns

Organizations today face an increasingly complex and evolving cyber threat landscape.

Traditional security approaches struggle with

Limited visibility across IT environments, delaying threat detection.

Operational complexity, making security management inefficient.

Resource constraints, leading to slow incident response and inadequate security postures.

Data protection & compliance risks, exposing organizations to regulatory penalties and breaches.

High alert fatigue, overwhelming security teams with excessive, unprioritized alerts.

Our Solution

VisionX is a **Next-Gen Managed Detection & Response (MDR)** platform designed to proactively detect, analyze, and mitigate threats with cutting-edge intelligence and automation.

VisionX combines powerful MDR capabilities with deep data security insights

Provides real-time visibility across the enterprise.

Delivers smarter risk intelligence for proactive security.

Enables strategic, data-driven security decisions for leadership.

Optimizes security operations, reducing complexity and improving efficiency.

The VisionX Advantage

Enhanced Visibility and Transparency
- Provides real-time monitoring across the entire IT environment, enabling quicker threat detection.
- Ensures potential threats are identified proactively, reducing the risk of breaches.

Elevated Risk Intelligence
- Integrates advanced risk management features to offer deeper insights into cybersecurity posture.
- Identifies vulnerabilities and prioritizes security efforts, strengthening defenses against evolving threats.

Strategic Decision Support
- Delivers actionable recommendations that align with business objectives.
- Empowers leadership to make informed, data-driven security decisions.

Streamlined Security Operations
- Combines MDR and MDDR to simplify security management and reduce complexity.
- Optimizes resource use, enabling faster incident response and better data protection.

AI-powered Threat Detection
- Identifies and classifies sensitive data automatically, improving visibility and compliance. Utilizes AI-driven search to analyze incidents and logs for faster threat detection.
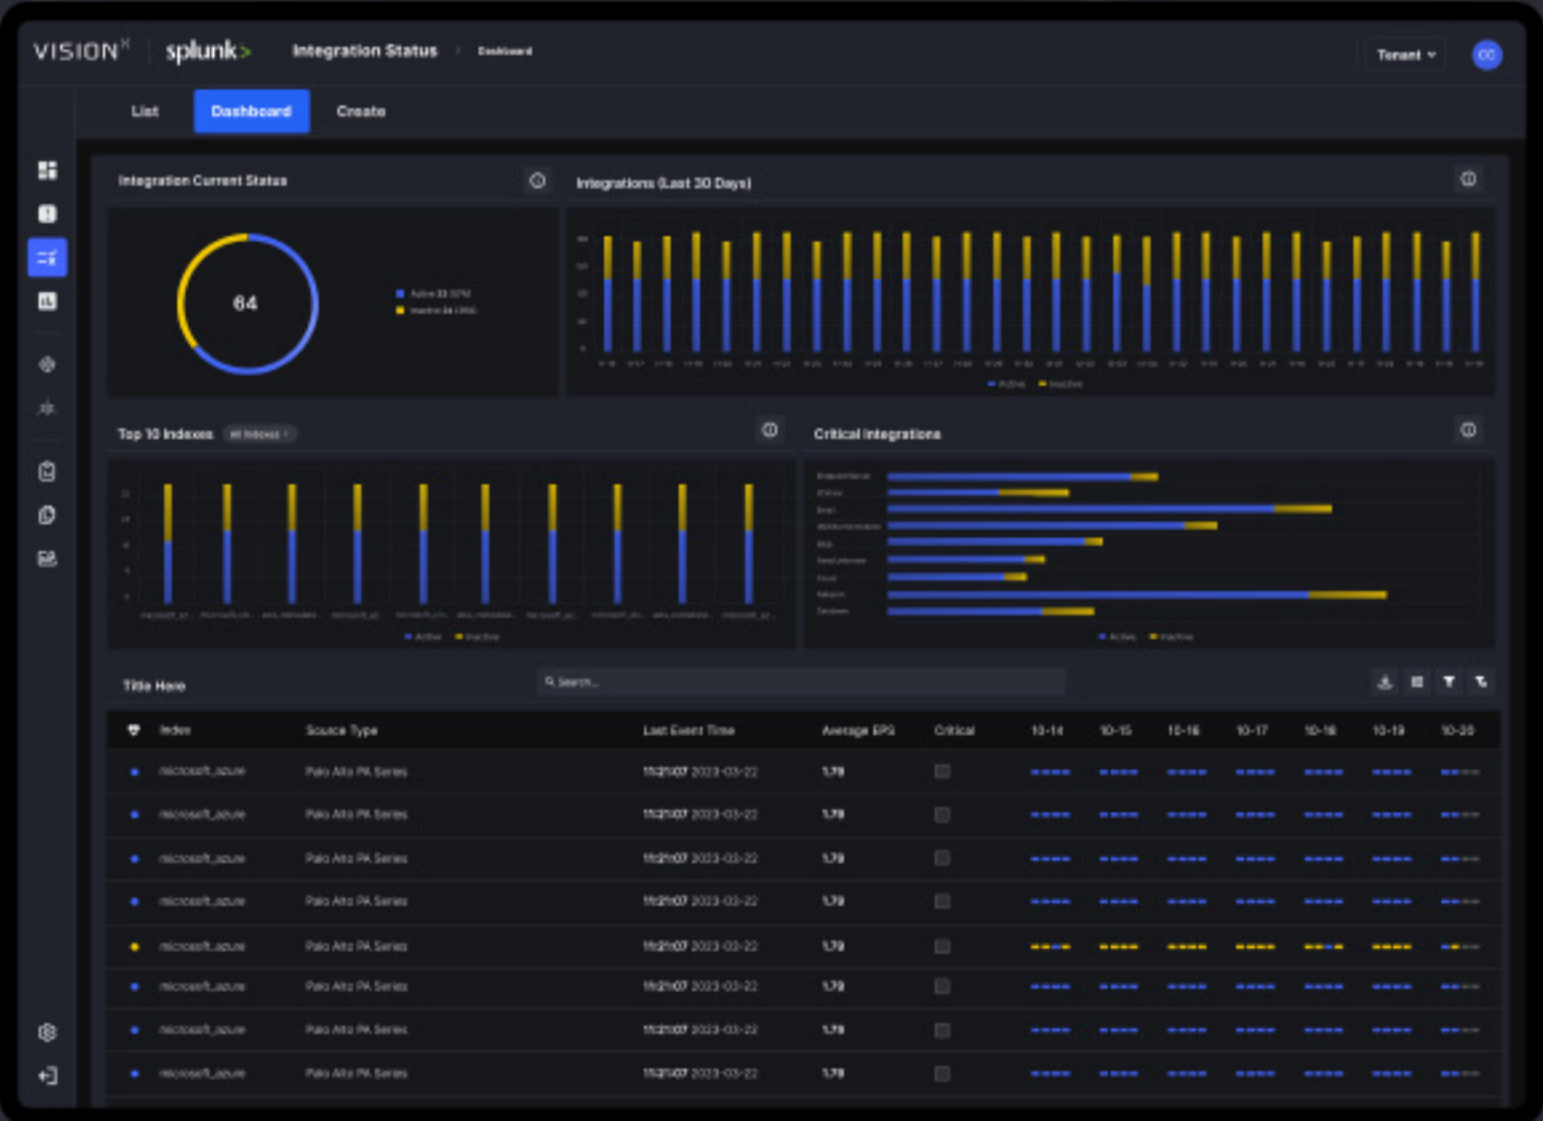

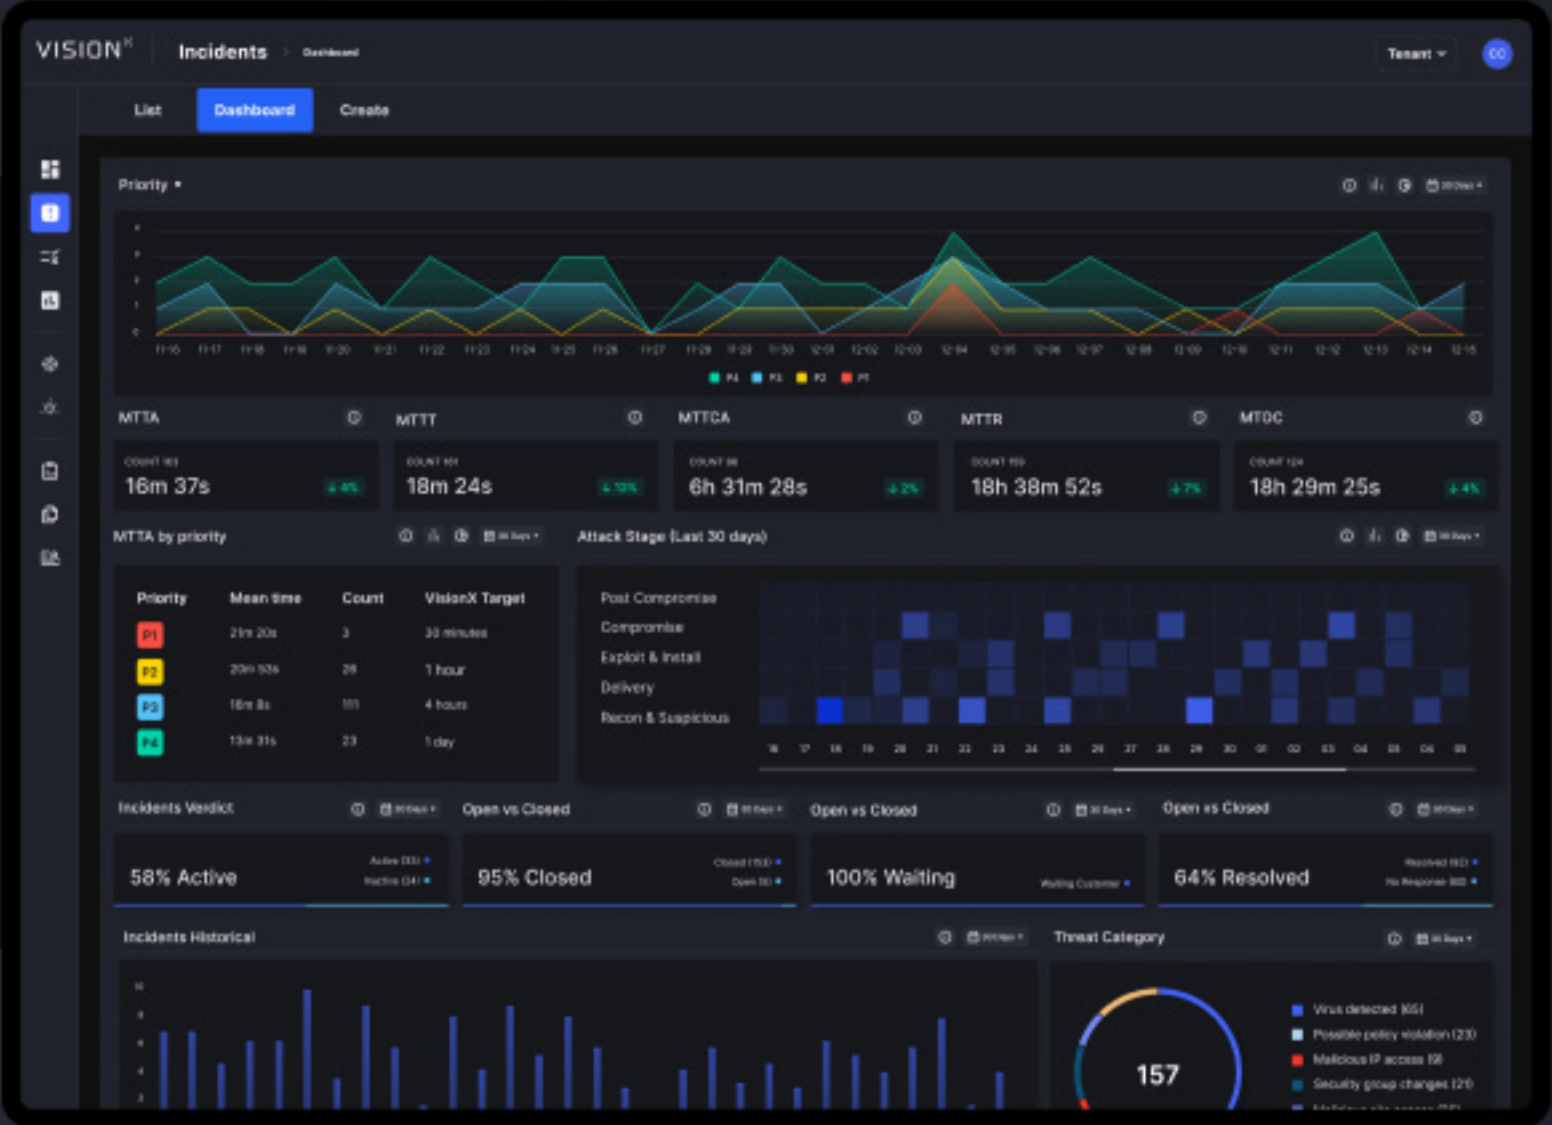

VisionX Integrations

We have an established and continually growing list of integrations

WIZ   Radar   paloalto NETWORKS

Chronicle   GETVISIBILITY own your data   KnowBe4 Human error. Conquered   N◉PHISH

Incident Management

- Centralized dashboard for real-time incident tracking and response.
- Tracks key service metrics such as MTTA, MTTT, MTTCA, MTTR and MTOC.

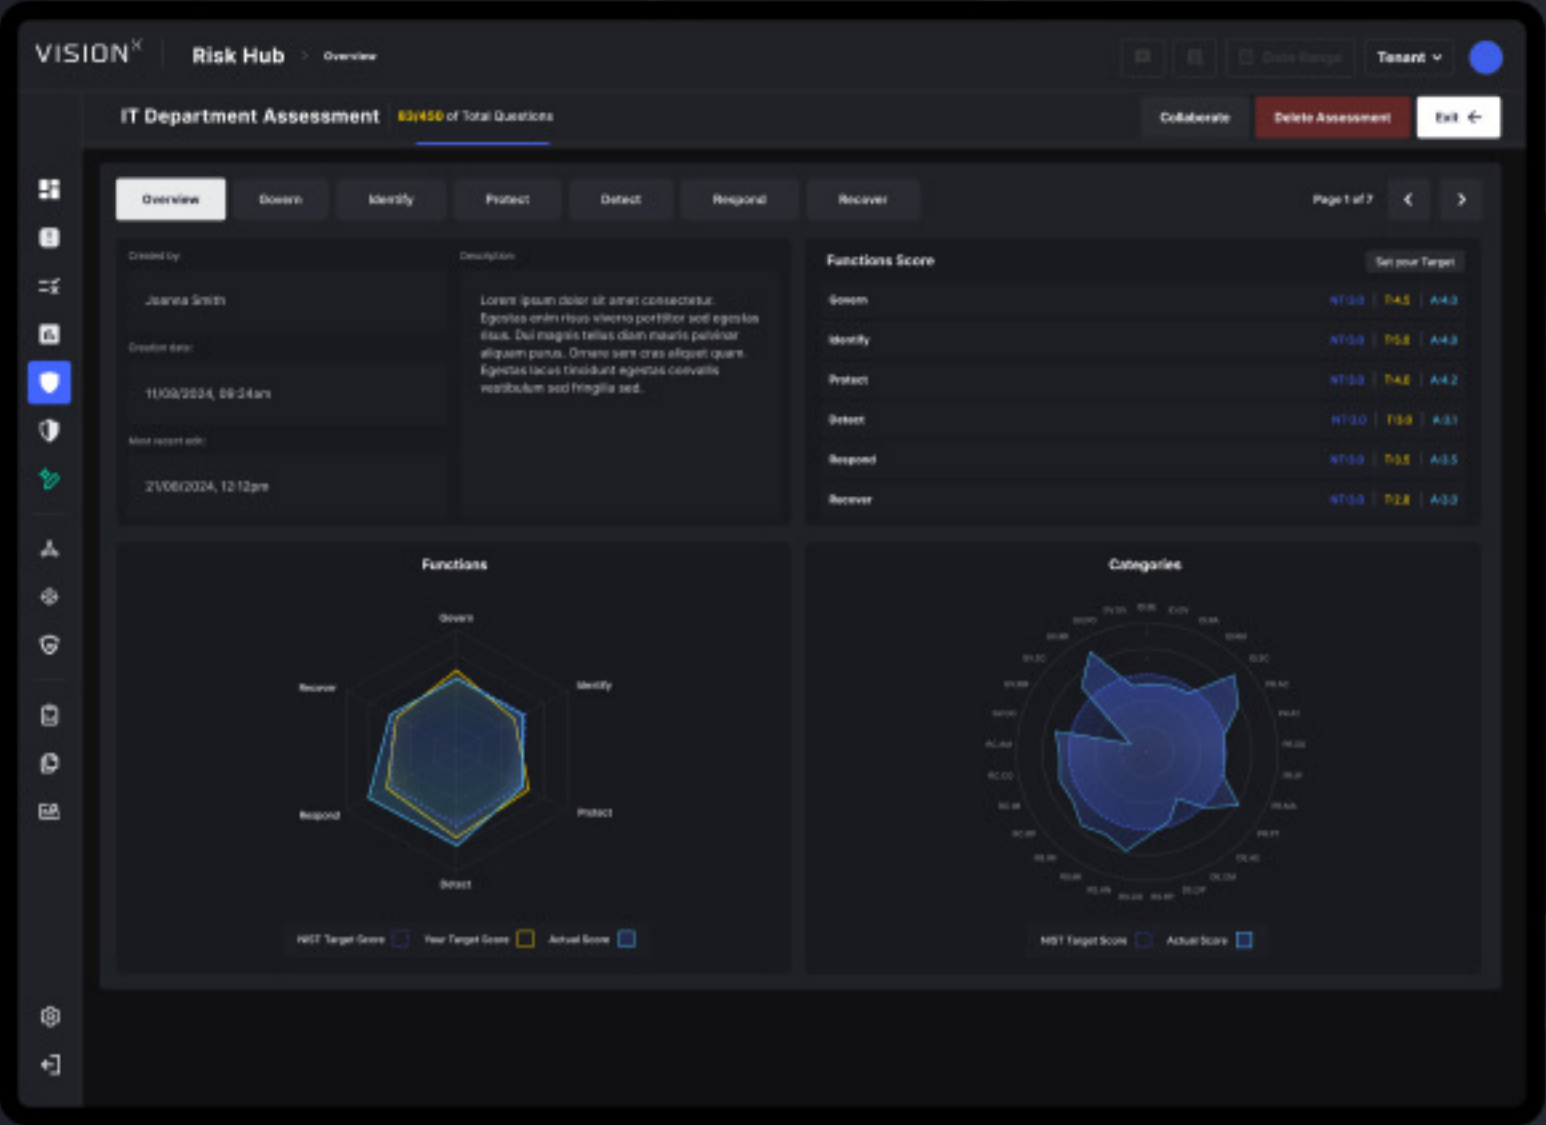

Data Source Management

- Seamless integration with diverse security data sources (QRadar, Splunk, Google Chronicle and more).
- Ensures visibility across diverse environments for effective threat detection.

Risk Hub : Risk Overview

- Provides a clear, visual representation of security risks and trends.
- Helps identify and prioritize potential threats.
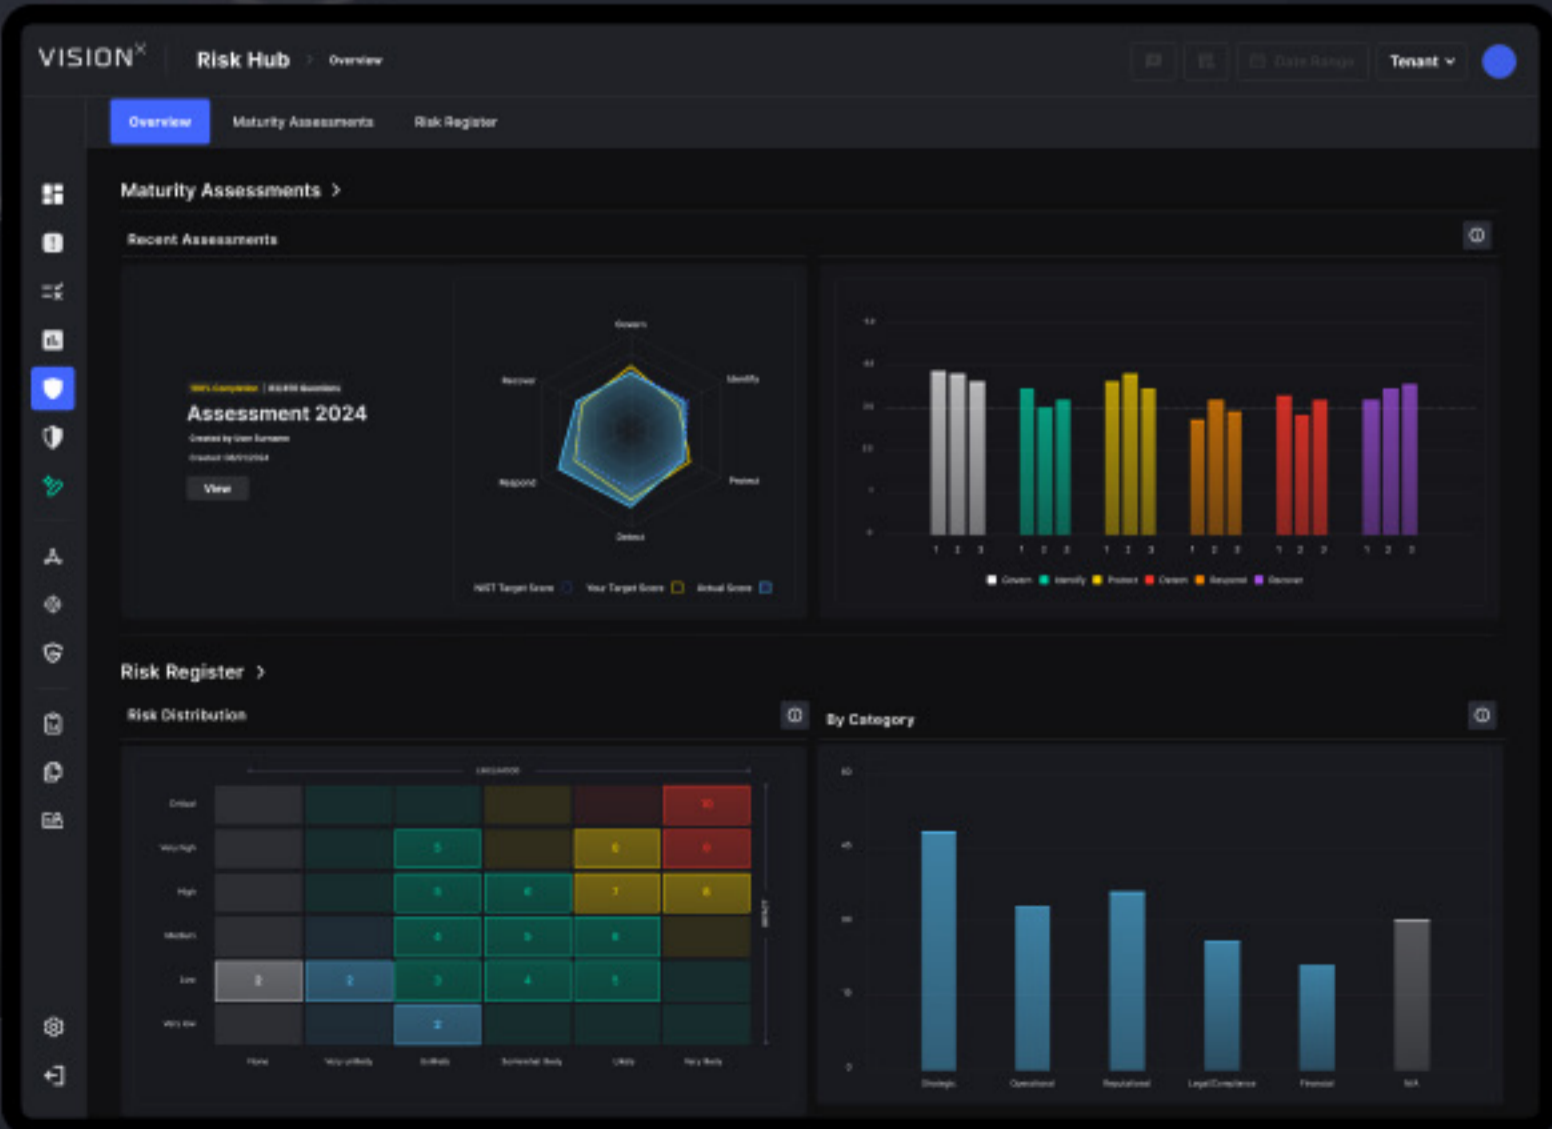

Risk Hub : Maturity Assessments
- Evaluates cybersecurity posture using the NIST CSF 2.0 framework.
- Identifies gaps and provides targeted improvement recommendations.

Risk Hub : Risk Register
- Centralized repository for tracking and managing security risks.
- Enables proactive risk mitigation and compliance alignment.
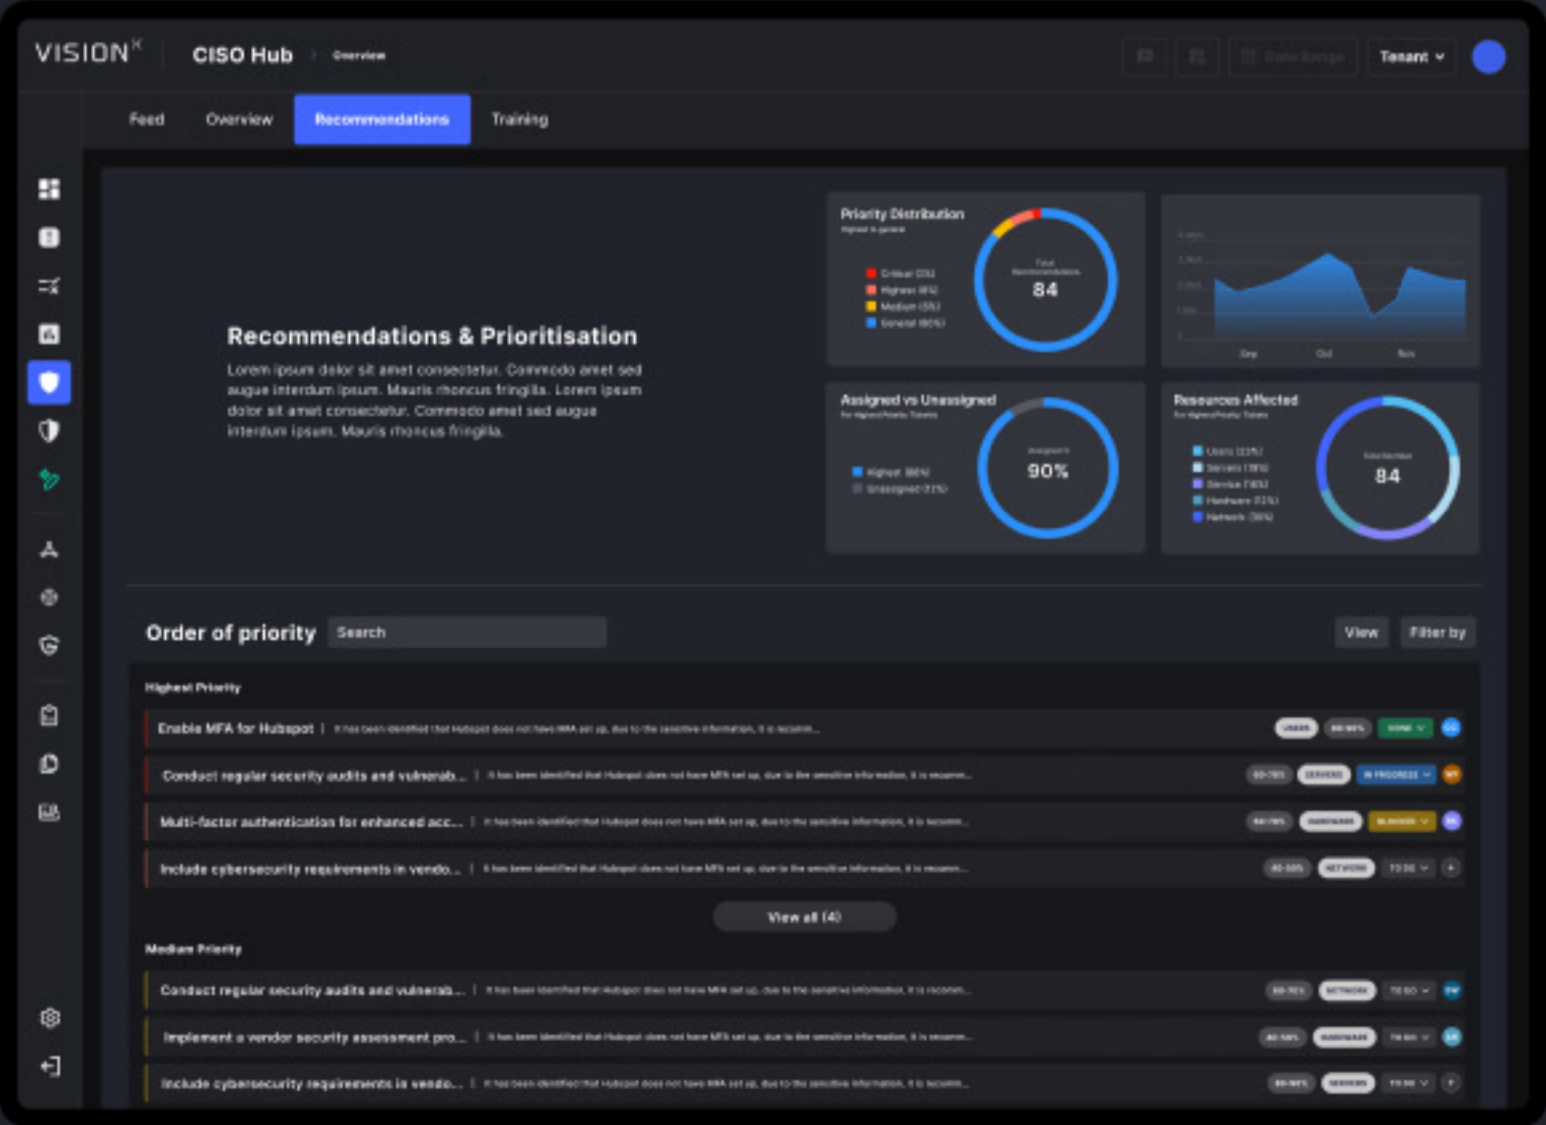

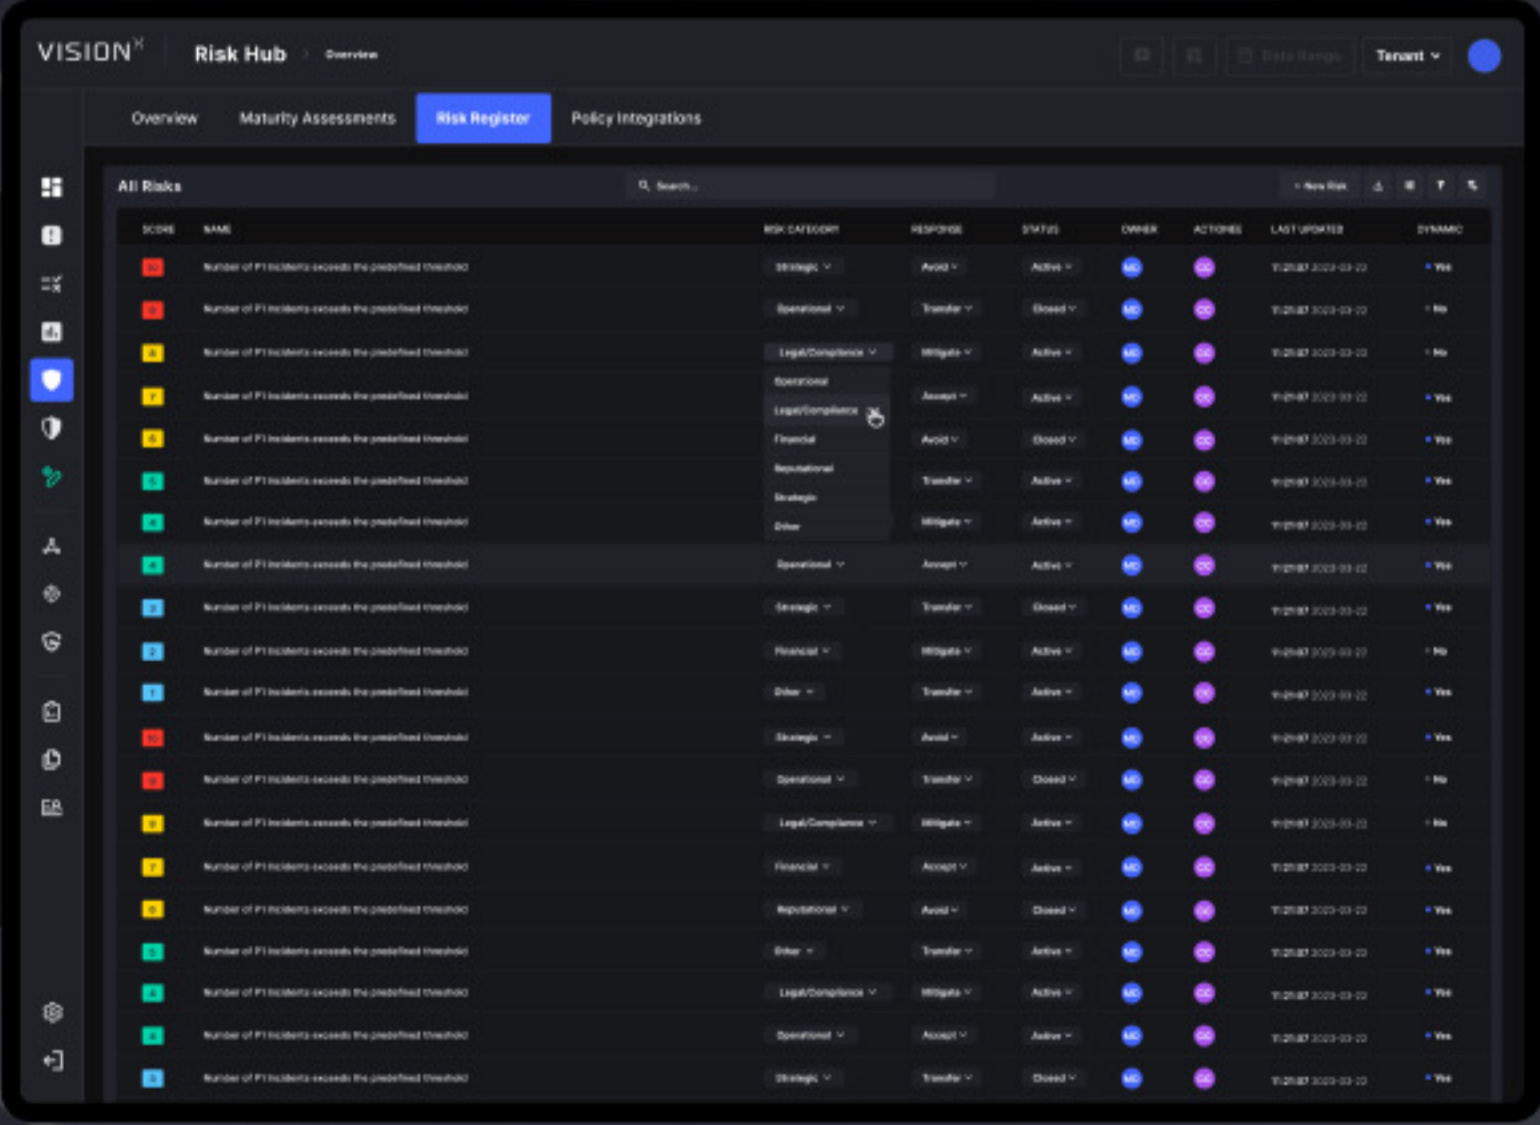

CISO Hub : Curated Recommendations
- Drawing from Smarttech247's deep understanding of your environment, identifies strategic initiatives.
- Helps improve both current and future cybersecurity posture.

CISO Hub : CISO Feed

- Real-time updates on threats, incidents, and trends.
- Provides actionable insights for proactive decision-making.

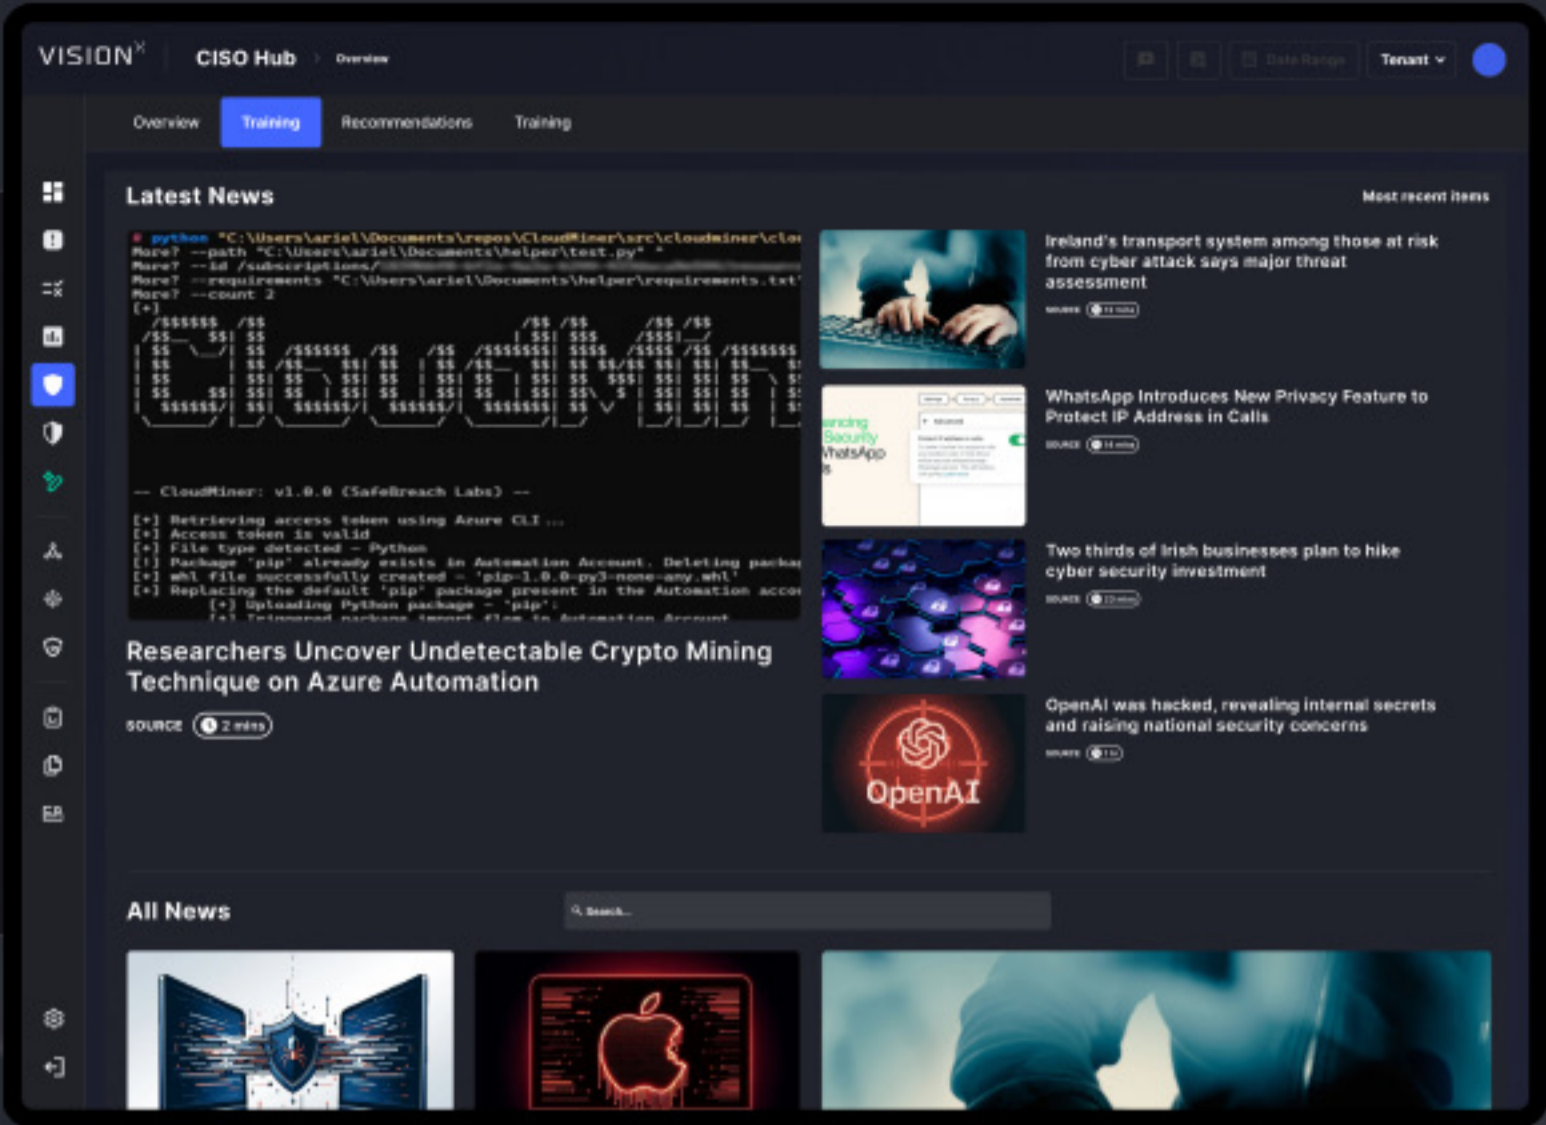

CISO Hub : Security Awareness Training

- Integration with platforms like KnowBe4 for CISO-specific training content.
- Provides insights on training effectiveness and engagement.
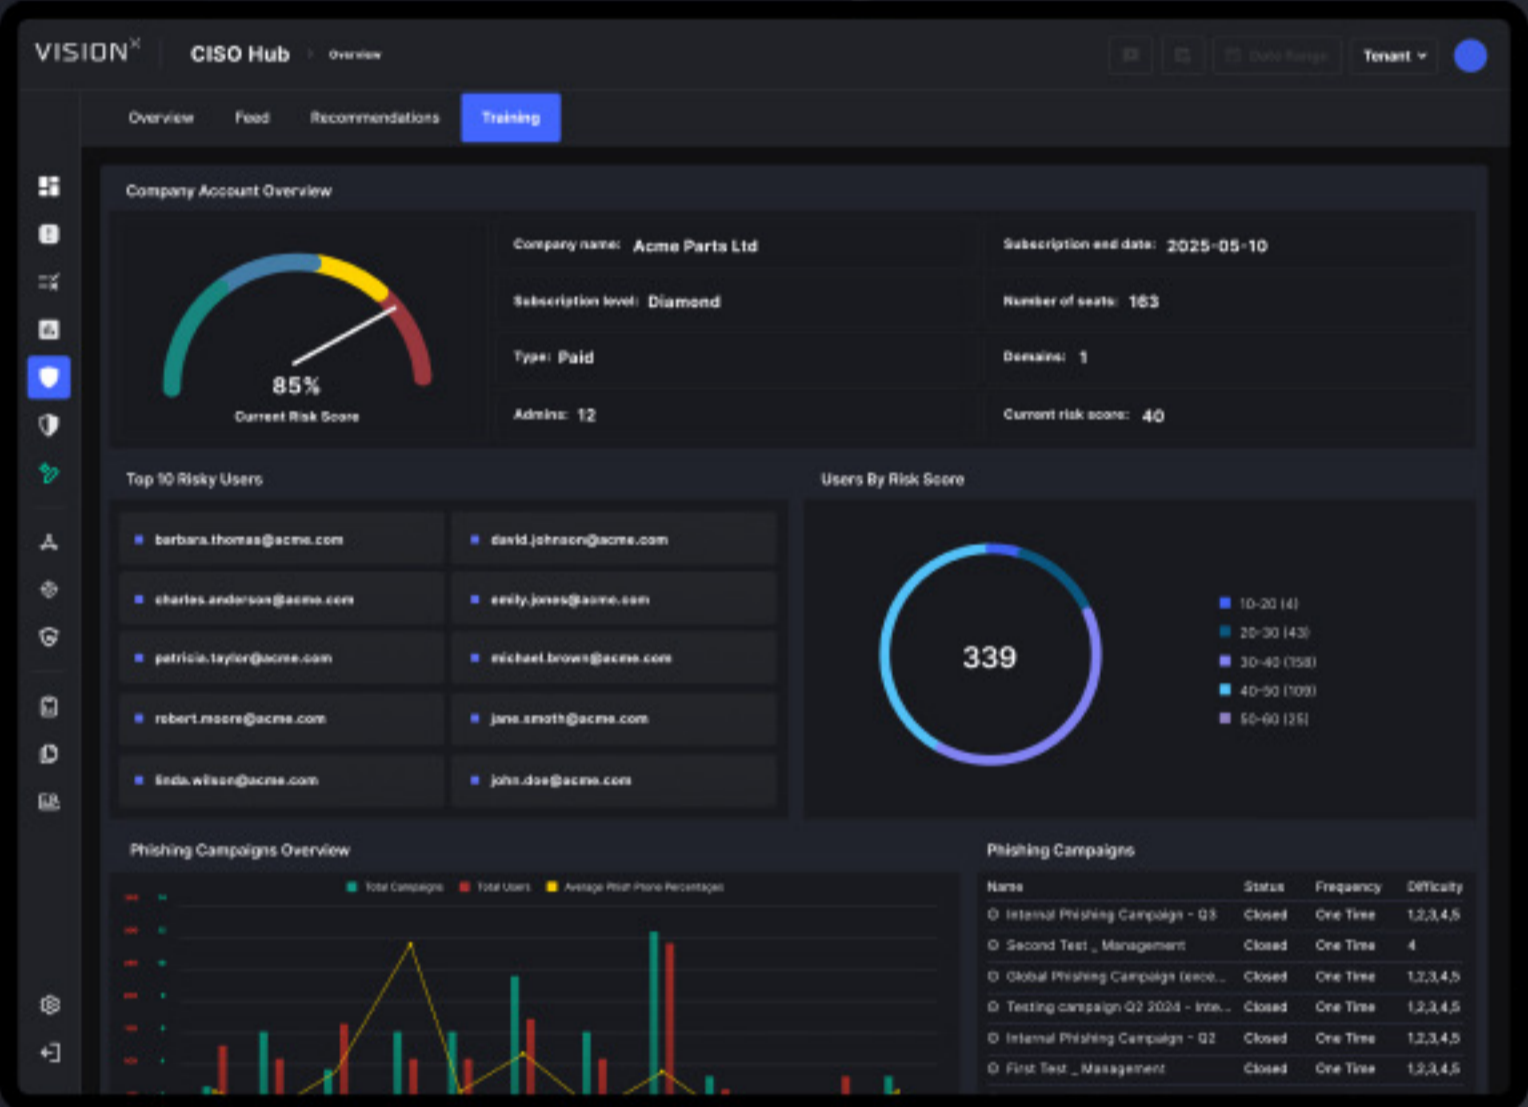

Data Security Posture Management

- Seamless integration with GetVisibility for enhanced data visibility and risk management.
- Improves threat detection and strengthens security posture with real-time insights.
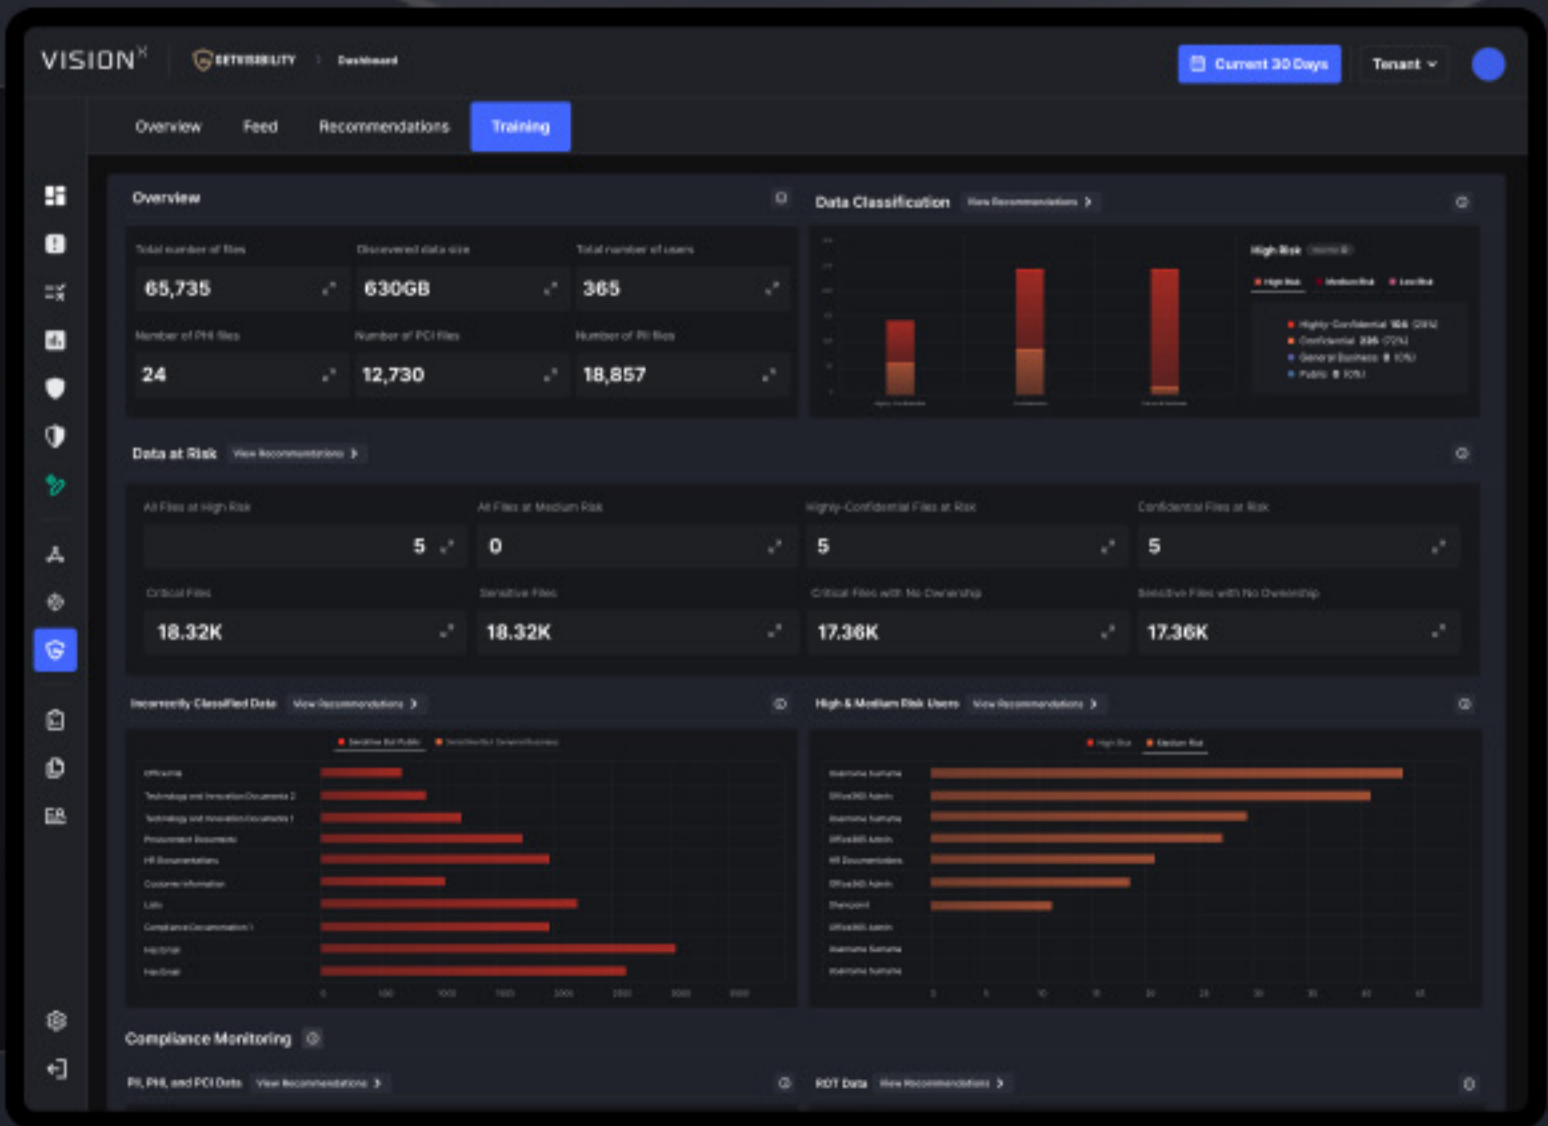

VISION^X

Smarttech247 is a multi-award-winning expert Managed Detection & Response (MDR) company and a market leader in Security Operations. Trusted by world's largest global organizations, our expert MDR and AI-enabled unified VisionX MDR platform provides continuous monitoring, advanced threat detection, investigation & response capabilities, 24/7.

Choosing Excellence with VisionX

- Proactive Threat Detection: VisionX uses advanced intelligence to detect and mitigate threats in real time.
- Comprehensive Coverage: Full visibility across your entire IT environment for efficient security management.
- Actionable Insights: Data-driven recommendations that align security with business goals.
- Tailored Solutions: Seamless integration with your existing technologies and specific security needs.
- Expertise You Can Trust: Leverage Smarttech247's deep industry knowledge for reliable, best-in-class security.

Get the support that you need to enhance your cyber defenses and improve your security posture.

- 24/7 Managed Detection & Response
- Data & Information Security
- Governance , Risk & Compliance
- Security Validation
